

ISP Term Project

Online Testing Center

Joseph Santucci and Matthew Schaub

Diagram of System Design

Implementation Tools

- Github for collaboration
- HTML, CSS, JSP
- SQL for Data Storage

Issues encountered

- Implementing the upload test feature
- Figuring out how to set up our database tables
- Displaying all the questions from any given test table
- Student ID table naming

Conclusions

- Fixed all issues besides upload feature
- Learned a lot about database design
- How to work with SQL using JSP and HTML output
- Collaboration and integrating more than one person's code
- Time management and delegation
